**Abstract:** the work in zhengding period is a key stage for comrade xi jinping to enter into politics. General secretary xi jinping regards it as his second hometown, and pays attention to a lot of feelings, but also produces very precious ideas and spiritual food. In the work of zhengding, general secretary xi jinping has worked hard to promote the rapid economic development of the region and summarized the rich content of party building work, forming a rich experience in party building work, work ideas. Next, I will try to explore the content and main characteristics of xi jinping's thought on party building in zhengding period.

**Keywords:** Positive definite period; Xi jinping. Party building thought; Content; Characteristic; To explore the.

### **1. Basic connotation**

Xi party building thought has abundant connotation, complete system, rigorous logic, formal engineering is put forward to suggested great career, enhance the consciousness of the four, advancing a governing party, the firm put the construction of the party's political important position, adhere to the synchronous development with the party, height to maintain the authority of the central leadership. These key theories are the deepening understanding of the construction principles of the marxist ruling party.

We continued to uphold and strengthen the party's overall leadership. This is also the core of xi jinping's thought on party building. First, we will comprehensively improve the party's leading position and role to an unprecedented level. It is pointed out that the party's leadership is the most prominent feature of building socialism with Chinese characteristics, the key advantage of the system with Chinese socialist characteristics, and the important guarantee for the unified will and basic interests of the whole party and the people of all ethnic groups in China. Second, we must truly uphold and ensure that the party takes an overall view of the situation and coordinates the leadership of

all parties. To strengthen the party's leadership, we must first resolutely uphold the authority and unified and centralized leadership of the CPC central committee with comrade xi jinping at the center. The third is to reaffirm and highlight when the overall work of the leadership. The party is the foundation of all leadership; Fourth, strengthen and improve party leadership. We will continue to strengthen self-purification, self-reform and self-improvement, and work hard to advance the great building of the party.

The overall requirements for party building in the new era. This is a new achievement of xi jinping's thought on party building. We will define the political standards for party building in the new era, uphold and strengthen the party's overall guidance, and carry out strict party governance. Determine the party's construction line in the new period, that is, constantly improve the party's long-term governance level, and around the construction of purity. In the new era, we will carefully plan the party's work, take political development as the unified leadership, focus on ideals and beliefs as the main purpose of developing the party, mobilize the enthusiasm of the whole party in its work, implement the work of institutional improvement, intensify the fight against corruption, and continue to raise the level of party building. Make clear the construction goal of the party in the new era, that is, build the party into a party capable of accepting various tests and full of vigor and vitality.

Seeing Party self-governance exercised fully and with rigor. This is the core of xi jinping thought. It was innovatively put forward that to lead the great revolutionary cause, the party needed to carry out its own revolution. The key to governing the party with strict discipline is to constantly strengthen the party's leadership. The basic requirement for Marx to pay attention to political parties is to emphasize politics, and the political construction of the party is the most basic work. We will focus on ideological development as the fundamental building of the party, unswervingly carry out education in our convictions, and arm our minds with xi jinping thought on socialism with Chinese characteristics for the new era. Strict management and discipline building are the basis of strict party governance, and discipline and law should be given top priority. In the management style of work should play a model role, the initial generation of head goose effect. To improve the style of work system on a regular basis, constantly improve, with good party style to drive the folk style. Strictly control corruption, adhere to the corruption will be reversed, strictly grasp the severity of punishment, improve the system of punishment and prevention of corruption, through the spirit of reform to continue to innovate and ensure the anti-corruption system; We will strengthen intra-party oversight and jointly develop basic projects.

We will run the party by institutions and by rules. This is also the main content of xi jinping's thought on party building. First, it is important to highlight the importance of

running the party by institutions. The key is to effectively govern political life within the party through institutionalized, procedural and specific methods, so as to ensure the progress and purity of the party. Second, to highlight the new period of party building work should be highly integrated ideological party building and institutional party governance. Strict party governance depends on education, but it also depends on the system. Fourth, we should resolve the problem of weak links in development through reform and strive to achieve a more complete system of laws and regulations within the party. Fifth, we will implement the rule of law system within the party. Strengthen the investigation and inspection mechanism, and constantly improve the ability to implement laws and regulations.

## **2. Main features**

### **1. Political characteristics**

In the implementation of the county party committee policy in 1986, comrade xi jinping pointed out that communists need to have a clear position, take a clear stand to support and oppose, especially to maintain a clear attitude of right and wrong. We should attach great importance to political unity with the CPC central committee, set forth the ultimate goal for the party to strive for, scientifically define the basic line of seeking truth from facts, and serve the overall goal. In light of the party's line and principles, it should be carried out independently to avoid misgivings. It is based on his promotion, zhengding cadres with enthusiasm to actively build socialist cause. We will concentrate our main efforts on truly implementing the party's principles and lines and maintain a unified political altitude with regard to party autonomy. At the same time close contact with the party's theory and policy, fully ensure the authority of the party central committee. Comrade xi jinping has said that we must unswervingly respond to the party's call, never talk empty talk or cliches, and carry out our work in all fields. Under all circumstances, we must put our positions in order to prevent political deviation. The central committee of the party has initially formulated a large policy guidelines, clear rules and regulations, after the need for an orderly implementation. All party members and comrades should keep a clear head and conscientiously abide by the correct leadership of the party central committee; Highly unified with the requirements of the party central committee, the consciousness is sublimated into a kind of consciousness [1].

### **2. Characteristics of marxism**

In the initial stage of reform and opening up, due to the impact of the cultural revolution in the past decade, some people outside the party have become somewhat relaxed in their belief in marxism and communism. The general secretary even linked the nihilism with communism. He was aware of the harm of such remarks, so he was

more determined to develop the ideological education of communism. He pointed out that we should help people to truly realize that we need to complete relevant work based on the communist ideology and strive to implement the communist social system. The party has identified the highest ideal and goal as communism, which is also the ideal and belief of the communist party, is a most distinctive label. Since the 18th CPC national congress, the general secretary has constantly highlighted the issue of ideals and beliefs, and repeatedly told all party members to unswervingly implement marxist beliefs, attach great importance to the revolutionary ideal, and avoid the phenomenon of lack of beliefs. Now we need to face all kinds of severe tests, cultivate the party spirit, and guide the common understanding of the whole nation through the communist faith [2].

### 3. Organizational characteristics

Comrade xi jinping pointed out that the county party committee should carry out its work in an overall way and emphasize the key points. Relevant personnel should coordinate to deal with the core work of each period, not only dealing with matters within the scope of their responsibilities, but also ensuring the overall work. Carry out the standing committee meeting every quarter earnestly, organize self-criticism, strengthen unity and enterprising work. As a basic organizational principle of the party, the democratic centralism requires members to perform their respective duties and work in coordination to avoid the phenomenon of political fragmentation. Comrade xi jinping asked zhengding county party members to work together to promote reform. The general secretary has made a request to party committees at all levels that if they want to do their leadership work well, they should show their role to the greatest extent. Good at handling the close relationship between the various committee members, scientific application of marxist methods, but also need to seriously summarize work experience, the party's good tradition to carry forward.

### 4. Style characteristic

Comrade xi jinping has made the building of the party's style a key issue. For leaders at all levels, it is a permanent topic to carry out the work of style building with bold and bold measures. Comrade xi jinping has solemnly pointed out that the regulation and establishment of rules should be strictly formulated by the collective leadership. Eight of these rules are of vital importance. The formulation of this part of rules, need to rely on scientific guiding ideology, to highlight the concept of party governance [3].
